

# JACKSON<sup>®</sup> TRANSFORMER CO.

*Quality Magnetic Products*

## *the* Line Frequency Transformer

For frequencies of 50/60 Hz, specify a **JACKSON<sup>®</sup> Line Frequency Transformer**.

**JACKSON<sup>®</sup> Line Frequency Transformers** are customized to meet customer requirements, and are available in various ratings. All designs are optimized utilizing our exclusive computer programs to ensure the highest quality product.

Available from 120 to 6500 volts, 5 kVA to 3000 kVA.

Available in Single or Three Phase.

Available in a NEMA type enclosure or open frame.

**JACKSON<sup>®</sup> Line Frequency Transformers** are available in dry type or water-cooled construction.

The water-cooled copper windings utilize a unique construction allowing for a compact and efficient design.

Cores are manufactured using high quality silicon steel with very low core loss and low exciting current.

Input and output connections can be designed to meet specific requirements.

Available in Metric or Standard U.S. Threads.

For a high quality customized **Line Frequency Transformer** - Specify a **JACKSON<sup>®</sup>**

**WORLD CLASS TRANSFORMERS FOR WORLD CLASS CUSTOMERS**

**Reliable | Efficient | Economical | Compact**

**JACKSON<sup>®</sup>** Magnetic Products are made to order and made to last!  
At **JACKSON<sup>®</sup>** we work together with you, as a team,  
to design a product that meets **your specific** requirements.  
**JACKSON<sup>®</sup>** Transformer Co. - Quality magnetic products you deserve!

**JACKSON<sup>®</sup>** Transformer Company provides our customers with a complete **Specification Sheet** upon request.

**JACKSON<sup>®</sup>** Quality Products are not only a wise choice,  
but the right choice.

**WE MANUFACTURE SOLUTIONS**

**ALL OF OUR MAGNETIC PRODUCTS ARE DESIGNED TO MEET YOUR SPECIFIC REQUIREMENTS.**
